Dear Sirs,

I am writing to you as a Charter Member of the Oregon-California Trails Association. It has come to our attention that the Idaho Power Company proposes to place wind turbines along the Old Oregon Trail crossing the Trail approximately six times. This is alarming and upsetting to our organization as we act as stewards of the Trail and it's historical and cultural significance.

There are a number of alternatives for the placement of these proposed wind turbines. The B2H is projected to cross the trail many times. The trail does not renew itself, once gone always gone.

Please help us to continue to protect the integrity and beauty of this important part of our countries history.

Sincerely,

Joyce P Bolerjack

NW Chapter, OCTA Membership Chairman
