We are a family owned business that is going on it's 4th generation. Our livelihood and the livelihood of many employees is weighted on this business. We are not affected by the DEIS as we are in Roseburg, OR., however, many other's are. Families that have had ranches, etc. for several generations whose livelihood is based solely on Ranching, grazing, crops, etc. We know personally those whose lives will be negatively affected by this. Please consider the hard work and dedication these people put in everyday tirelessly because it is their heart, it is their life! I challenge you to put yourselves in their position. You will be stripping them of blood, sweat and tears. You will be damaging the legacy that they are passing down to their children and grandchildren. Enough is enough!!! Be honest about your proposal's and figure out a way to bypass these said properties.

Thank you~!
