

MAR 17 2015

To Whom this May Concern:

Understand the deadline is coming up soon on where the B2H line will go.

B.L.M. VALE DISTRICT

One of the routes was over by Brogan. My husband (Mark) & I live just outside of Brogan, our property surrounds Pole Creek Reservoir.

We have a very nice view of Cottonwood Mtn. If the line was to go between us & Cottonwood Mtn. It would not be good to look out across & see the B2H line running across there.

If we was to sell our property, I'm sure it would lower the value. No one else would like to have to look at the big power line.

Is there another alternate route that would be better than the one out of Brogan.

Would appreciate you looking more into the Tub Mtn. route.

Our neighbors Dave & Maxine Moody live across the hi-way from us.

The Brogan route would come across from were we live to our neighbors the Moody's.

Again it would be in an area, where we could see it. Before we moved here 13 yrs. ago, we use to live →

south of Marsing. We lived at the end of the road, with the Owyhee Mtns, right behind us.

Not far from where we lived was one of those big power lines.

Walking or riding a horse, it makes a very loud popping, crackling sound. Even worse when it would rain.

We kind of have an idea on nasty they are to look at or live by.

Hopefully you'll take into consideration of going a different direction for the B2H project.

Sincerely,
Mark & Susie Alexander
