I am looking forward to leaving the city in my retirement to move to my cabin in the Blue Mountains. To hear about a project like this that is even considering destroying beautiful family farms and forest land with no regard to the fact that once it's done it's natural beauty has been defiled - there is no going back - the damage is done and done forever. I am asking Idaho Power to rework their plans to limit the destruction of places people call home and make a living.
