Dear Idaho Power Company and Planners of B2H,

As you are hardworking Americans, I cannot believe that you would endorse this project to overtake people's homes and land. I would hope that you hold the value of families memories over money and conveniences. Does this plan really have to go through like this? I bet not. I'm sure that there is a different path you can take without affecting families and their homes. Honestly, we all work hard to get to where these families are. People bust their butts to have land and a home to share with their families and generations to come. I think you would understand this too, as you probably work to provide a home and memories for your own families. There must be another way for everybody to be happy. Sometimes you have to make a path where there is no path, but that path does not include destroying innocent people's land and homes.

Thank-you,
Sarah Brandt.
