As the route of the B2H project has been brought to my attention, I feel it is necessary to comment on the detriment the proposed route could pose to a number of private landowners, including many dear friends who sacrifice a lot of blood, sweat and tears to build their agricultural businesses, raise their families, and establish a decent quality of life. It is critical that Idaho Power reconsider their proposed route in order to steer away from private land, and especially dwellings and/or farmsteads. Many of the properties along the proposed route have been a part of these families for generations, and I have lived and worked on some of them myself. The grandeur and beauty of those places will be forever altered by Idaho Power's proposal, and so will the lives and livelihoods of those who live and work along that route. Thank you.
