Subject: Proposed transmission lines

I would rather see the transmission lines go to the Portland Metro area where they are needed more than we need them here. I would also like to see the money that would have been spent on this project put towards solar energy. The power that those transmission lines would supposedly bring to my area is negligible. Local solar power would benefit the area more. The same amount of employment & more local power would be generated by the construction of solar energy over putting in more overhead lines.

That being said...the companies that are involved have never been known for their common sense and the cooperation's will do what they want regardless of what the people need or want. I only ask that the landowners who will be affected by this project or any other project be fairly and justly compensated for their land.
