I am a property owner in North Powder, we purchased property from the Don Buerkel Trust several years ago and according to your map it appears that the proposed transmission line will cross over the corner of our property.

This appears to be Mile 130 and tenths 1-2-3 on your map.

We invested over \$ 400,000.00 dollars in new irrigation wells last two years for additional water to irrigate the corner of the property that will be encumbered by the project. We use center pivot irrigation and it will rendered useless by the line crossing.

we are asking that the project move over to miss our corner so that our center pivot will be able to irrigate that corner. Also a concern is that if we are irrigating the corner and with sprinklers there could be conditions with wind and misting that static electricity from the line could cause potential conflict with our farming practices.

Thank you for this consideration
