BLM

Why would the BLM work so hard to create this one-of-a-kind historic trail center at Flagstaff Hill and then another later project, also under BLM, seek to destroy the view they worked so hard to create?

Within the agency there is surely some department that would see the conflict and seek to avoid one arm destroying the purpose of the other???

Please save what was already so purposefully built, a very important part of the history of Oregon, the northwest, and historic sites west of the Mississippi that champion the huge westward movement of the 1840s-1880s that, in fact, saved the area from being British land.
