I am opposed to the glass hill route and the alternate glass Hill Route in segment 2 of union county.The new transmission line should not cut a new passed through timbered land with lots of fish and wildlife impacts. Thereis too much irreversible damage to this remote area that so many people love. The line should follow the I 84 Corredor or the existing transmission line already passing through the area.The two new routes goes right through the best elk hunting habitat in the entire area.
