March 19, 2015

To Idaho Power Co:

B.L.M. VALE DISTRICT

Dealing with the Boardman to Hemingway project, this route will enter my farm land when it first enters the valley NW of Jamieson Oregon. It will first cross a pivot that has existed for about 5 years. Even so your maps don't show a pivot being there. This line will adversely effect this pivot as well as any other future pivot structures. This line would make aerial spraying difficult and could adversely effect GPS farming and irrigation electronics.

This project would Not Be Good for my farming operations

Sincerely
Fred H. Heid
