It saddens me that you are planning to place your high voltage power lines so closely to the homes of my family and friends on Upper McKay Creek. Many are the fourth or fifth generation to live in this area working hard on these lands to make a decent living a feed America. No one can say what the long term damage might be to humans, livestock or crops.

Your decision to place these lines so closely to homes in this area, has caused considerable stress to not only the landowners, but family members living nearby. Reconsider the line placement moving a mile or more away from existing homes.

Thank you,

Flossie Keeler
