**Subject:** Boardman to Hemmingway Transmission

The B2H project will ruin our small farm's breathtaking views and potential earnings. I consider myself a progressive who believes in being a good steward of the land and in renewal energy. This project does not fit that criteria but instead is a continuation of traditional corporate thinking.

- If true energy conservation plans were implemented, this project would not be needed
- Electrical power should be decentralized
- Citizens should be empowered to use off grid power solutions

How is this project going to benefit the small farmer in Oregon?

Sincerely,

Robin Klotz RN, BSN, PCCN, CHFN- Nanna and Farmer
