I am writing this letter to state my opposition to the location of the 500kV Transmission Line proposed to run through private property between Melba, Idaho and Boardman, Oregon - (B2H). I am urging Idaho Power to go back to the drawing board and develop a plan that does not harm private land owners, farm lands, businesses and ultimately the pristine country that many many people truly love and cherish. PLEASE DO NOT grant B2H authorization to cross privately owned lands. Please explore the other options that Idaho Power has.

Thank you for your time.

Piers Lamb
Boise, Idaho
