The proposed 500 kilovolt towers and high tension lined planned through Union County, Oregon, should be as FAR AWAY as POSSIBLE from the La Grande's city park of Morgan Lake. I understand the current plan would place the line within 1,000 feet of little Morgan Lake. Not only will it be aesthetically unappealing for this beautiful local refuge, but also a source of noise pollution with its constant electrical humming. For power that is not even used by locals, please respect our landscape and high quality of outdoor life, by placing the line at an alternate route as far west as possible.
