I live in La Grande and am bothered by the idea that the line runs so close to a our mountain city park: Morgan Lake. This is a lovely place, used by many people, and the huge ugly power line going by will be an eyesore.

My vote is for you to choose the alternate route that passes farther away from Morgan Lake Park.

For the record, I am totally against this project and feel railroaded by Idaho Power Co. The residents of Oregon will be paying the price (i.e. having to look at these ugly lines) in order to give residents far away some power. Shame on you as a company - your long-term vision should include looking at local options, conservation or controlled and manageable growth.

Sincerely,

Anne March
