I think that the agency preferred route is the best way for the line to go. I live in Medical Springs and the NEPA alternative route would be very detrimental to this area. It would greatly impact our watershed, making it even harder to be able to irrigate our property properly, and affecting stockwater. It would interfere with wildlife (deer and elk) migration, summer and winter habitat. It would affect cattle grazing and weight gain on private property and forest and BLM permits. And it would be an eyesore, which would reduce property values.

Sincerely,
Mike McGinnis
