We grew up on McKay Creek in Pilot Rock and have raised cattle, grown feed for them; grown crops, made our living from that land. It sickens us to see what devastation you are going to bring into our beautiful scenic productive way of living. You are going to disrupt wildlife, take out beautiful trees, destroy generations of family heritage, destroy the tranquility and pristine beauty all for a buck. At the top of the list is the health and safety of those that have to live under these monsters. If you feel you HAVE to do this; why can't you go underground with the project. We understand that would cost more; but, it would save some of our natural beauty and not expose people/children to the danger the towers will bring. It is pure greed on your part to not listen to the folks that this affects. How can you be so callus as to not hear the hearts breaking with what you are planning. if Idaho Power wants to move forward, they must go back to the drawing board and develop a plan that does not harm private land owners, farm lands, businesses and ultimately, this pristine country that we truly love. Please do not grant B2H authorization to cross privately owned lands. WE BELIEVE IDAHO POWER HAS OTHER OPTIONS!
