Subject: B2H Transmission Line - website comment

Hello,

Please kindly consider using alternate routes for the B2H transmission line such that it avoids proximity and visibility from the Morgan Lake area near La Grande, Oregon as much as is possible. The lake, minor as it may seem on a map, is a local treasure and the community would like to maintain its beauty and natural appearance. Due to its very close proximity to La Grande, it is arguably the most frequently visited local outdoor locations for many residents.

While most friends and neighbors I know are generally in favor of increased electrical grid capacity, this is one of the very few significant bodies of water in the county. Please work with us to ensure its preservation, as much as can be reasonably accommodated.

Thank you for your time.

Best regards,

Brad Nelson
Electrical & Computer Engineer
La Grande, Oregon
