Generally I have very little disagreement with the current location of the proposed location of the line in Malheur County. I do have some concern with the line traversing along the marked Oregon trail. Recently Idaho Power asked for and received from the State of Idaho permission to pay for Solar for a five year period rather than the 20 year period that they had been required to pay for before. This makes me wonder about the need for power and therefore the need for this line other than the need to just wheel power.

Thank you for your consideration.
