Our family has grown for many years with many of the families directly affected by the loss of use in this area, if this goes thru. We were all taught to respect the land and do our very best to preserve it's use for many generations. After all this time of building a better future why would we allow it to be destroyed or used in a fashion that doesn't preserve our way of life? Especially when a more viable option that does less damage to local farm and family lands. Please reconsider.
