My comments on the Boardman to Hemingway Transmission Line Project are:

I do oppose the B2H Line Project going accross glass hill. After working all my life I bought a property with a fabulous mountain view and wonderful wildlife. After purchasing the property my friends, grandchildren and I and my wife planted a couple hundred trees to restore the landscape from logging and budworm damage. My property is looking better than ever. The thought of a transmission line going through the glass hill area is in complete contrast and of absolute disregard to the property owners who have worked hard to have what we have and what our children and their children will have. There are other places this line could go. Please leave the signs of urban encroachment down in the cities or out in the desert's of eastern Oregon, but not in our forests.
