My comments on the Boardman to Hemingway Transmission Line Project are:

My goal in being involved in the siting of the B2H powerline in Malheur County has been to eliminate or at least minimize the impact on private property especially farm ground.

The current route is much better than the 1st one proposed by Idaho Power. But it still crosses farm ground and could impact the operation of farming in this area.

I can support the current proposed route IF
 - the land owners willingly agree to the route through their land.
 - the exact siting within the route is flexible enough to minimize the impact on their operation

I will actively oppose any change in the route that moves it over additional farm ground in Malheur County
