This proposition is not a benefit to the region. There's already an energy corridor, more land does not need to be destroyed for another one. My family owns land that would be incredibly negatively impacted by this, they grow hay and their ability to produce off the land would be severely diminished. This is their livelihood, and the land has been in the family for generations. Do NOT take away their land, livelihood, and means of income! That area is also a beautiful part of eastern Oregon that is very historical-- the Oregon Trail runs through it. Many tourists and visitors look out on that valley from the Oregon Trail Interpretive Center, and their view would be badly marred by power lines. This is not the legacy we wish to leave our children! Keep open spaces open and unobstructed. Keep the farmland free to be farmed. All over the world industrialization is encroaching on farms, threatening our food supply. DO NOT LET THIS HAPPEN HERE!!!
