Please reconsider the proposed power lines, this affects the land I grew up on, where many of my family members still live and work. The livelihood of the western lifestyle and well being of people hangs in the balance. The beautiful scenery, health of people and animal are at stake, and I hate to see such a large area of beautiful landscape marred by large power lines! Find another way, preserve what small pockets of nature, ranch land, and beauty we still have in our area!
