

BLM  
B2H Project

03-16-15  
300647

We own property which will be affected by the B2H Line. Currently there are two power lines within 100yds of our home and they run directly through our feedlot and calving area. To add an ~~other~~ additional high power with these two would be a big problem for our operation and our lives.

Therefore we would like to see this new line located a little more to the east. This would keep it away from irrigated fields and out of our very back yard.

Please consider the changes proposed on the enclosed maps. #1 would have the line follow the fence line from the Peayon property under the Interpretive Center south to the Harrell and Morris property line and south to the three corner fence between Harrell, Morris and our property.

#2 would follow about 250' from the existing lines east through the Ragsdale property and then go to the corner of the Harrell, Morris line property line, again follow south to the three corner fence between Harrell, Morris and Trindle

We would be happy to show these two routes to the people responsible for the location ~~of~~ of this new line.

Thanks,

Mike & Ann Trindle  
Trindle Land LLC.
