The timber canyon alternative travels directly in line with my family's home. This property has been in my family for over 30 years. My husband and myself built our home with our own hands, with the intention of it being passed down to our children and grandchildren. In reviewing the documents provided, I find it extremely deceptive that the photos show property in the open, vast desert land rather than the timbered forest that my home is in. Decision makers should be required to travel every inch of these routes so that they are fully informed of the true impact of their decisions. On my end of this route, we have old growth forest that they would want to cut down, in order to put this atrocity in. Hundreds of thousands of trees would be destroyed forever in the name of clean energy. I do not see where the logic in that is.
