The BLM and Idaho Power have come up with an unacceptable plan that affects not only the environment, but also many land owners. It is an area of fertile farm land. Animals, both wildlife and domestic, would be adversely affected by living under the power lines that you are proposing. Families live here. They have children whose lives would also be adversely affected by living under the power lines. If Idaho Power feels that it is necessary to move forward on this transmission line project, I feel that the environment as well as health of humans and animals must be protected. I don't feel that your current plan takes this seriously enough. I believe that you have attempted to mislead and intimidate landowners that object to this plan. I BELIEVE IDAHO POWER HAS OTHER OPTIONS!
